OCT 20 2000

WHEREAS, the United States of America filed a civil action seeking injunctive relief and the assessment of civil penalties against the Guam Waterworks Authority ("GWA") under the Clean Water Act, 33 U.S.C. §§ 1251 - 1387 (the "CWA"), and the Safe Drinking Water Act, 42 U.S.C. §§ 300f - 300j-26 (the "SDWA");

WHEREAS, the Government of Guam is identified in the Complaint as a defendant as required by CWA Section 309(e), 33 U.S.C. § 1319(e);

WHEREAS, the parties agreed that entry of a Stipulated Order for Preliminary Relief
("Stipulated Order"), which was approved and filed by the Court on June 5, 2003, was the most
appropriate way to require the immediate implementation of short-term projects and initial
planning measures by GWA and the Government of Guam (jointly "Defendants") to begin to
address issues of compliance at GWA's Publicly Owned Treatment Works and three public water
systems;

WHEREAS, the Stipulated Order provides that: (1) there shall be no material modifications of the Stipulated Order without the written approval of the parties to the Stipulated Order and the approval of the Court; and (2) all non-material modifications, which may include extensions of the time frames and schedules for performance of the terms and conditions of the Stipulated Order, may be made by agreement of the parties and shall be effective upon filing by the United States of such modifications with the Court;

WHEREAS, GWA has requested certain modification to the provisions of the Stipulated Order and the parties have agreed to make those modifications, add some additional requirements, and correct a typographical error in the Stipulated Order;

NOW, THEREFORE, in light of the foregoing recitals, the parties, through their respective undersigned counsel, stipulate to the following changes in the Stipulated Order and jointly request the Court to enter the following Order:

- 2 -

1	ORDER		
2	1. The following changes shall be made to the Stipulated Order:		
2	a. Substitute a new page 5 to add provisions to Paragraph 5 that: (1) specify the

WHEREAS, the United States of America filed a civil action seeking injunctive relief and the assessment of civil penalties against the Guam Waterworks Authority ("GWA") under the Clean Water Act, 33 U.S.C. §§ 1251 - 1387 (the "CWA"), and the Safe Drinking Water Act, 42 U.S.C. §§ 300f - 300j-26 (the "SDWA");

WHEREAS, GWA is a public corporation that has the authority to produce, treat, transmit, store, distribute, and sell water on Guam, as well as the authority to collect, treat, and sell or dispose of wastewater on Guam;

8 WHEREAS, GWA owns and operates five sewage treatment plants on Guam that are 9 subject to the conditions and limitations contained in National Pollutant Discharge Elimination 10 System ("NPDES") Permit Nos. GU0020087, GU0020222, GU0020095, GU0020141, and 11 GU0020273 issued by the U.S. Environmental Protection Agency ("EPA") pursuant to the 2 CWA;

WHEREAS, GWA owns and operates wastewater collection and conveyance systems, including approximately 75 sewage pump stations, that transport raw sewage to its sewage treatment plants;

WHEREAS, the NPDES permits require GWA at all times to properly operate and
maintain all facilities and systems of treatment and control (and related appurtenances) that are
installed or used to achieve compliance with the conditions of the permits;

WHEREAS, the Government of Guam is identified as a defendant as required by CWA Section 309(e), 33 U.S.C. § 1319(e);

WHEREAS, GWA owns and operates three public water systems that supply drinking water for the majority of the population of Guam: the Northern, Central, and Southern Systems;

WHEREAS, GWA's public water systems are required to comply with the National Primary Drinking Water Regulations under the SDWA, including the Maximum Contaminant Levels for microbiological contaminants and the treatment technique for turbidity;

WHEREAS, the United States sought in its Complaint both a preliminary and permanent

injunction as well as the appointment of a receiver to address issues of compliance in GWA's Publicly Owned Treatment Works ("POTW") and three public water systems;

WHEREAS, the parties agree that entry of this Stipulated Order for Preliminary Relief is the most appropriate way to require the immediate implementation of short-term projects and initial planning measures by GWA and the Government of Guam (jointly "Defendants") to begin to address issues of compliance at GWA's POTW and three public water systems;

7 WHEREAS, the Guam Public Utilities Commission issued an Order on April 10, 2003
8 (see Attachment A to this Stipulated Order), renewing its commitment to provide GWA in a
9 timely manner with adequate rate relief to enable GWA to comply with an EPA-approved
10 strategic plan in a prudent and reasonable manner;

WHEREAS, the parties contemplate entering into a further stipulation to address
additional compliance issues after Defendants' completion of the initial planning measures set
out in this Stipulated Order for Preliminary Relief;

THEREFORE, before taking testimony or adjudicating any issue of fact or law, and
without any finding or admission of liability against or by GWA or the Government of Guam;

16

17

I.

IT IS ORDERED, ADJUDGED, AND DECREED as follows:

Submittals by Defendants

1. Compliance Monitor: Within ten days after the date of entry of this Stipulated 18 Order for Preliminary Relief by the Court (hereinafter the "Entry Date"), GWA shall appoint one 19 individual whose primary responsibility will be to coordinate and report on all compliance 20 activities and deliverables required by this Stipulated Order for Preliminary Relief. Within 20 21 days after the Entry Date, GWA shall provide notice to EPA listing the individual's name. 22 address, telephone and fax numbers, and e-mail address. If GWA appoints a new person as 23 compliance monitor, GWA shall provide contact information about the new compliance monitor 24 to EPA within 10 working days after the appointment. 25

26 27

28

2.

EPA Approval of Plans and Other Submittals: After review of any plan, program,

report or other item required to be submitted for approval under this Stipulated Order for 1 2 Preliminary Relief, EPA shall submit to Defendants in writing either an approval or detailed 3 comments explaining why EPA does not approve the plan, program, report or other submittal. Defendants shall have 30 days from receipt of EPA's comments to submit a revised plan. 4 program, report or other submittal that fully addresses and responds to EPA's comments unless a 5 longer time period is agreed upon by all parties. Defendants shall use their best efforts to 6 incorporate EPA's comments to the extent practicable. Representatives of the parties shall make 7 themselves available during the comment period to informally discuss questions and comments 8 on any documents. Defendants' failure to respond to EPA's comments shall constitute a 9 10 violation of this Stipulated Order for Preliminary Relief. The procedures of this Paragraph shall also apply to any revised plan, program, report, or other submittal. 11

12

II.

Management and Organizational Structure of GWA

General Manager: Within ten days after the Entry Date, the Consolidated 3. 13 Commission on Utilities ("CCU") shall advertise to hire a full-time General Manager at GWA. 14 At a minimum, the General Manager shall have the following qualifications: (1) a Masters 15 degree in Management, Engineering, Finance, or Public Administration, or, in the alternative, a 16 Bachelor's degree and registration as a Professional Engineer pursuant to the National Council of 17 Engineering Examiners standards in either the Civil, Mechanical, or Electrical Branch; (2) at 18 least ten years of combined senior management experience at drinking water and wastewater 19 utilities, with experience in both areas; (3) proven management and communication skills; 20 (4) demonstrated ability to lead, motivate, and develop staff; (5) experience with planning, 21 22 design, and construction of major wastewater or drinking water infrastructure projects; and (6) knowledge and experience with: a) drinking water or wastewater engineering, b) user fee 23 system development, c) bond funding, d) staff training and development, and e) federal drinking 24 water and wastewater requirements. The CCU shall use its best efforts to hire a qualified 25 General Manager within 90 days after the Entry Date. 26

27 28

4. Chief Engineer: Within 40 days after the Entry Date, the CCU shall advertise to hire a full-time Chief Engineer at GWA. At a minimum, the Chief Engineer shall have the following qualifications: (1) registered professional civil, mechanical or electrical engineer; (2) ten or more years of professional engineering experience; and (3) fully competent and proficient in planning, design, construction, and operation of wastewater treatment facilities, drinking water disinfection systems, wells, and drinking water distribution and transmission systems. If possible, the applicant shall also have experience in wastewater collection systems and surface water treatment systems. The CCU shall use its best efforts to hire a qualified Chief Engineer within 120 days after the Entry Date.

5.

Financial Officers:

A. <u>Chief Financial Officer</u>: Within 60 days after the Entry Date, the CCU shall advertise to hire a full-time Chief Financial Officer at GWA that has the appropriate qualifications (e.g., Certified Public Accountant or Certified Management Accountant) and experience. The Chief Financial Officer shall oversee GWA's Finance, Treasury, Accounting, and Purchasing programs, and shall oversee GWA's compliance with federal and local requirements. The CCU shall use its best efforts to hire a qualified Chief Financial Officer within 150 days after the Entry Date. The Chief Financial Officer may perform duties for the Guam Power Authority pursuant to the Chief Financial Officer's employment agreement with the CCU.

B. <u>Assistant Chief Financial Officer</u>: By November 30, 2006, the CCU shall hire an Assistant Chief Financial Officer ("ACFO") for GWA. The ACFO must have a Bachelor's degree in finance, economics, or accounting, and adequate senior level/supervisory experience. By November 30, 2006, GWA shall submit a report to EPA and Guam EPA with documentation on the professional qualifications and experience of the person hired as ACFO.

28 REVISED 10-3-06

6.

General Manager's Authority: In order to allow GWA to operate as an

1 independent agency, the Chief Financial Officer shall be under the direct supervision of GWA's General Manager: Within 30 days after the Entry Date, Defendants shall provide a report to EPA 2 on any legal and administrative barriers preventing GWA's General Manager from directly 3 supervising GWA's Chief Financial Officer, and recommend a course of action, including 4 5 proposed legislation or administrative measures, to deal with this issue. By November 9, 2003, Defendants shall respond to EPA's comments in accordance with Paragraph 2 and shall take 6 7 action to address this issue, including submitting proposed legislation to the Guam Legislature 8 and/or implementing required administrative measures. The CCU reserves the right to review all 9 decisions made by the General Manager with respect to the Chief Financial Officer.

7. 10 Conflict of Interest Provision: GWA may enter into a service contract with a third 11 party (such as an engineering or consulting firm or a contract employment firm) to permanently 12 or temporarily fill GWA's staff vacancies. In order to avoid potential conflicts of interest that may arise in that situation, GWA shall not engage in any business other than staffing services 13 14 with that third party (and any related corporate or business entities) for the duration of the service 15 contract. After the Entry Date, all contracts used to fill new positions on a permanent or 16 temporary basis at GWA shall be limited to either of the following: (1) a contract between GWA 17 and the individual hired; or (2) a contract between GWA and a third party that agrees to provide 18 no other service to GWA except for staffing services for the duration of the service contract.

19 20

21

22

23

24

25

26

8. <u>GWA Personnel</u>

A. <u>Certification of Operators in Direct Responsible Charge ("DRC Operators")</u>: Within 180 days after the Entry Date, GWA shall ensure that DRC Operator positions are staffed by operators who have obtained certification at the level required for that position by the Guam Environmental Protection Agency's ("Guam EPA") "Water and Wastewater Systems Classification" memorandum dated October 17, 2002. If current DRC Operators at GWA are not certified at the required level, GWA shall, within ten working days after the Entry Date, notify those employees that they have 180 days after the Entry Date to

27

28 || REVISED 10-3-06

obtain the required certification. If an employee does not obtain the required certification within 180 days after the Entry Date, GWA shall transfer the employee and fill the position with a properly certified DRC Operator.

B. Engineering Support: By January 31, 2007, GWA shall either: (1) hire senior level engineers for water and wastewater in accordance with this Paragraph, or (2) enter into an engineering services contract to provide the equivalent engineering support. GWA shall hire or enter into an engineering services contract for at least three full time senior engineers with the following credentials: (1) a Bachelor of Science degree in civil, mechanical or electrical engineering; (2) registration as a professional engineer (P.E.) pursuant to the National Council of Engineering Examiners in any state with the ability to obtain a P.E. in Guam within one year; (3) a minimum of four years of engineering experience; and (4) a minimum of four years of experience in water or wastewater facilities design, construction, and operation and maintenance. For the senior engineer positions, an advanced engineering degree may be deemed as the equivalent of one year of professional experience. Any engineering support services contract entered into by GWA to fulfil this requirement shall include the same number of engineers with the same engineering qualifications and professional experience as above. GWA shall require the contract engineers to be located at GWA for the duration of the contract services. GWA shall provide to EPA and Guam EPA a copy of each engineer's professional qualifications and experience within ten (10) days of hiring. If GWA elects to enter into an engineering support services contract, GWA shall provide a copy of the contract, scope of work, and the engineers' professional qualifications and experience for EPA's review prior to finalization of the contract. GWA shall provide a copy of the documents concurrently to Guam EPA.

C. <u>Senior Wastewater Operator or GIS/Land Information System Manager</u>: GWA shall increase wastewater operational and technical support through the hiring of either a

Senior Wastewater Operator or a GIS/Land Information System Manager by January 1, 2007. The Senior Wastewater Operator shall have, at a minimum, a Level IV Wastewater Treatment Operators certification with two years of Level IV direct responsible charge experience or a Level III Wastewater Treatment Operators certification with five years of Level III direct responsible charge experience. The GIS/Land Information System Manager shall have, at a minimum, two years of GIS/Land Information System management experience and a BS in Computer Science, GIS, Engineering, or a related field. GWA shall provide EPA and Guam EPA a copy of the Senior Wastewater Operator's or GIS/Land Information System Manager's qualifications and experience with ten (10) days of hiring.

11 9. GWA Reorganization: GWA shall complete a full reorganization according to the 12 following schedule. Within 90 days after the Entry Date, GWA shall submit to EPA and Guam 13 EPA a draft reorganization plan that proposes a new structure for GWA to ensure that GWA is 14 most capable of completing its mission. For each work unit, the draft plan shall provide at a 15 minimum: a description of work functions, the numbers of employees, and a summary of 16 certifications and qualifications needed for each category of employee. Within 30 days after 17 receipt of EPA's comments on the draft plan, GWA shall respond to EPA's comments in 18 accordance with Paragraph 2 and provide a final reorganization plan to EPA and Guam EPA. 19 20 21

REVISED 10-3-06

6B

1

Within 90 days after GWA has prepared a final reorganization plan, GWA shall submit to EPA and Guam EPA a draft report containing position descriptions and minimum job qualifications that meet industry standards and Guam laws for each position in the new organization. Within 30 days after receipt of EPA's comments on the draft report, GWA shall respond to EPA's comments in accordance with Paragraph 2 and shall provide a final report to EPA and Guam EPA.

7 Within 90 days after GWA has provided a final reorganization plan, GWA shall also 8 submit to EPA and Guam EPA a draft Staffing Plan Report that includes the following 9 information: (1) an evaluation of current staff resources at GWA and a discussion of where new 10 hires or retraining will be needed to staff the new organization; (2) a timetable for 11 implementation of staffing measures; and (3) procedures for the transferring of staff and staff 12 reductions (and recommended legislation to enable such changes) as necessary. The draft 13 Staffing Plan Report shall require: (1) all positions in the reorganization of GWA shall be filled 14 with an employee qualified at the minimum level required for that position within 180 days after 15 the final Staffing Plan Report has been issued; and (2) when GWA hires a new employee to fill a 16 position, that employee must be properly qualified for the position at the time of hire. EPA will 17 review the draft Staffing Plan Report and may require changes, additions, deletions or 18 modifications it deems necessary to ensure proper operation and maintenance of GWA's POTW 19 and public water systems. Within 30 days after receipt of EPA's comments on the draft report. 20 GWA shall respond to EPA's comments in accordance with Paragraph 2 and shall provide the final Staffing Plan Report to EPA and Guam EPA. GWA shall implement the Staffing Plan 21 22 Report's measures in accordance with the timetable in the final Staffing Plan Report. If current 23 employees are not certified at the required level, GWA shall notify such employees within ten 24 working days after the final Staffing Plan Report has been issued.

25

26 27 III. Operations at GWA

10. <u>Water Resources Master Plan</u>: Within 30 days after the Entry Date, GWA shall

7

28 REVISED 7-26-04

prepare a draft scope of work and a draft Request for Proposals ("RFP") for the preparation of a 1 Water Resources Master Plan ("Master Plan") and submit them to EPA for approval. GWA shall 2 provide a copy of the documents concurrently to Guam EPA. EPA will review the draft scope of 3 work and RFP and may require any changes, additions, deletions or modifications it deems 4 necessary. Within 30 days after receipt of EPA's comments, GWA shall respond to EPA's 5 comments in accordance with Paragraph 2 and shall submit a final scope of work and RFP to 6 EPA and Guam EPA. GWA shall advertise the RFP for the preparation of the Master Plan 7 nationally. 8

Within 90 days after submitting the final RFP to EPA and Guam EPA, GWA shall 9 provide a list of at least five qualified offerors, including the qualifications of each offeror, to 10 EPA and Guam EPA. EPA will provide written notice of the names of any offeror(s) that it 11 12 disapproves and an authorization to proceed with any of the other offerors. GWA may select any 13 offeror from that list that is not disapproved and may award the contract to that offeror. GWA shall select and retain one of the qualified offerors within 105 days after obtaining EPA's 14 15 authorization to proceed, shall notify EPA and Guam EPA of the name of the contractor, and 16 shall begin to prepare the Master Plan (the "Commencement Date").

GWA shall develop a Master Plan that includes:

A comprehensive analysis, using as a guideline the "10 States Standards" as they 18 (1) apply to wastewater, of wastewater treatment, collection, and conveyance systems, 19 20 improvement alternatives, and needs for the next twenty years. The Master Plan 21 shall include an infiltration and inflow assessment of GWA's wastewater 22 collection systems sufficient to identify and prioritize problem areas. The Master Plan shall also include an assessment of the following: septic system hookup 23 24 needs and alternatives, decentralized treatment systems, consolidation with the 25 U.S. military's wastewater systems, biosolids management and re-use, and an 26 analysis of costs and other impacts.

28 REVISED 7-26-04

17

27

A comprehensive analysis, using as a guideline the Hawaii Water Standards of (2) 1 2002, of public water system improvement alternatives and needs for the next 2 twenty years that addresses disinfection, system pressure, surface water and 3 groundwater resources, treatment needs (including any drinking water well 4 needing treatment due to a determination that the well uses a groundwater source 5 under the direct influence of surface water), transmission and distribution system 6 7 improvements, potential consolidation with the U.S. military's systems, and water re-use. 8 A comprehensive analysis of the costs and benefits of water conservation on (3) 9 10 Guam. An evaluation of necessary process control system improvements, including a (4) 11 Supervisory Control and Data Acquisition ("SCADA") system, information 12 management systems, telemetry, and other applicable types of automation. 13 (5) A financial plan that details how revenue will be generated. The financial plan 14 shall include a user fee system, including fees for services such as sewer 15 connection fees. The user fees shall be based on actual water usage, estimated 16 wastewater generation, and actual costs of services provided. GWA shall 17 coordinate with the Public Utilities Commission ("PUC") to ensure that: 18 (1) GWA complies with the public notification requirements for proposed rate 19 increases in 12 GCA §§ 12001.1, 12001.2; and (2) GWA's filings for rate 20 increases are made in accordance with applicable PUC regulations. 21 (6) A detailed five-year plan for financing the continued operation, maintenance, and 22 repair of the POTW and three public water systems, including: (a) an estimated 23 annual budget for each of the next five years for all costs of operating, 24 maintaining, and repairing the POTW and three public water systems, including 25 the establishment and maintenance of the Financial Reserves listed in Paragraph 26 27 9 28

•	H						. 1
a ¹							
	1		32 below; and (b) a detailed	descriptive p	lan for raising	sufficient rev	enue to meet
	.2		the projected costs as outlin	ed in the annu	ual budgets, inc	cluding adjust	ments or
	3		increases in user fees, taxes,	, assessments	or other source	es of revenue.	Revenues
	4		shall be sufficient to cover a	all compliance	e activities and	deliverables	required by
٩	5		this Stipulated Order for Pre-	eliminary Rel	ief, as well as a	any other antic	cipated
	6		expenses, including any me	asures necess	ary to ensure c	ompliance wi	th the CWA
	7		and SDWA, costs related to	the infrastrue	cture improven	nents recomm	ended in the
	8	L	Master Plan, all related open	rations and m	aintenance cos	ts, and corres	ponding
	9		utility expenses, including n	maintenance o	of all required I	Financial Rese	erves listed in
	10		Paragraph 32 below.				
	11	The fol	llowing five tasks shall be co	ompleted as p	art of the Mast	er Plan. With	in the
	12	designated tim	e for completing each task, (GWA shall su	ıbmit a written	draft to EPA	for review
	13	and approval.	GWA shall provide a copy of	of each draft o	concurrently to	Guam EPA.	Within 30
	14	days after rece	ipt of EPA's comments, GW	A shall respo	ond to EPA's c	omments in a	ccordance
	15	with Paragrapl	h 2 and shall provide the fina	al written proc	luct to EPA an	d Guam EPA	. The
	16	schedule for th	nese tasks is the following:				
	17	(1)	Within 180 days after the C	ommencemen	nt Date, GWA	shall complet	e a leak
	18		detection study for all three	public water	systems.		
	19	(2)	Within 240 days after the C	ommencemer	nt Date, GWA	shall complete	e an
	20		estimated water budget that	quantifies an	d describes ho	w and where w	water is
	21		produced and utilized on Gu	uam.			
	22	(3)	Within 270 days after the C	ommencemen	nt Date, GWA	shall locate, n	nap, and
	23		develop Geographical Infor	mation Syster	m ("GIS") laye	rs for all of th	e following:
	24		treatment facilities, wells, w	vater lines gre	ater than or eq	ual to six inch	ies in
	25		diameter, collection system,	pump station	ns, and GWA's	and Guam E	PA's water
	26		quality monitoring stations.				
	27						
	28	REVISED 7-2	6-04	10			
	1	1					1

1	(4)	Within one year after the Commencement Date, GWA shall perform a hydraulic
2		analysis of the three public water systems and develop a hydraulic model of the
3		systems.
4	(5)	Within 540 days after the Commencement Date, GWA shall locate, map, and
5		develop GIS layers for all of the following (not included in subparagraph (3)
6		above): all other water lines, wastewater laterals, and all septic tanks over the
7		Northern Guam Sole Source Aquifer.
8	The N	Master Plan shall be completed according to the following schedule:
9	(1)	By October 31, 2006, GWA shall complete a draft Master Plan and shall provide a
10		copy of it to EPA and Guam EPA. Upon completion, GWA shall issue a press
11		release and publish notice in a local newspaper, indicating that the draft Master
12		Plan is available for public review at convenient locations (such as public libraries
13		on Guam and GWA's website) and announcing the date and location of any public
14		meeting to discuss the Plan. The draft Master Plan shall be made available for
15		public comment for at least 45 days. During the public comment period, GWA
16		shall hold at least one public meeting. GWA shall issue the public notice at least
17		30 days before the date of the public meeting.
18	(2)	By January 31, 2007, GWA shall complete a final Master Plan and shall address
19		all significant comments raised during the public comment period in its final
20		Master Plan. GWA shall provide the final Master Plan to EPA and Guam EPA
21		and shall perform the required tasks in accordance with the schedule set out in the
22		final Master Plan.
23	11.	Interim Disinfection Program: GWA shall develop an interim disinfection
24	program for it	its three public water systems to ensure that the water being provided to the public is
25	adequately dis	isinfected by chlorination. In order to ensure optimal chlorination and disinfection,
26		
27		
28	REVISED 10-	0-3-06 11
	I	

the interim disinfection program shall require that: (1) the optimal levels of chlorine residual, as measured in parts per million ("ppm") or milligrams per liter, is met at all times at all chlorination points, taking into consideration the contact time (in minutes) of the chlorine with the water in the distribution system prior to reaching the first consumer ("CT value"); and (2) a minimum level of chlorine residual of at least 0.2 ppm is maintained at all points in the drinking water distribution system at all times.

The interim disinfection program shall include a detailed description of the existing 7 chlorination practices including, but not limited to: (1) the locations of all existing chlorination 8 points for each public water system, including chlorination points at the Ugum surface water 9 treatment plant, chlorination points at the wellheads for the groundwater systems, and other 10 distribution system chlorination points; (2) the locations of any proposed immediate additional 11 wellhead and/or distribution system chlorination points; (3) the estimated contact time between 12 the chlorine and water in the distribution system before the water reaches the first consumer (i.e., 13 the closest connection in the distribution system) for each chlorination point; (4) actual chlorine 14 dosing levels (in ppm) at each chlorination point; and (5) actual CT value for each chlorination 15 point (where CT is defined as chlorine residual level in ppm multiplied by the contact time in 16 minutes prior to the first consumer). Based on the information included in subparagraphs (1) 17 through (5), the interim disinfection program shall include recommendations regarding the 18 following: (6) the optimal possible chlorine dosing levels (in ppm) to apply at each individual 19 chlorination point (taking into account the contact time available before the first consumer); and 20 (7) the optimal CT value for all chlorination points. The interim disinfection program shall 21 propose short-term changes to GWA's chlorination practices to improve disinfection that can be 22accomplished within one year after the Entry Date. 23

Within 90 days after the Entry Date, GWA shall submit the interim disinfection program
to EPA for approval. GWA shall provide a copy of the document concurrently to Guam EPA.
Within 30 days after receipt of EPA's comments, GWA shall respond to EPA's comments in

27

28

accordance with Paragraph 2, shall provide the final program to EPA and Guam EPA, and shall implement the program. GWA shall update the interim disinfection program annually and as needed to reflect the development of other compliance activities and deliverables required by this Stipulated Order for Preliminary Relief, shall provide its updates to EPA for its review and approval, and shall provide a copy to Guam EPA.

12. Public Water Systems' Chlorine Program

A. Interim Chlorine Residual Level Monitoring Program: GWA shall develop an interim chlorine residual level monitoring program for its three public water systems to ensure that: (1) optimal chlorine levels are maintained at all chlorination points, taking into account contact time prior to the first consumer after the chlorination points; and (2) a minimum chlorine level is maintained throughout the distribution system. The monitoring program shall contain a detailed description of the following: (1) the locations and frequency of all chlorine residual monitoring necessary in order to ensure that the optimal applied chlorine dose (as specified in subparagraph (6) of the interim disinfection program in Paragraph 11) and optimal CT's (as specified in subparagraph (7) of the interim disinfection program in Paragraph 11) are maintained at all chlorination points at all times; and (2) the locations and frequency of chlorine residual monitoring necessary to ensure that a minimum level of chlorine residual of at least 0.2 ppm is maintained throughout the distribution system at all times. The proposed monitoring shall consist of either continuous, online, automated chlorine residual monitoring or grab samples to be collected and analyzed in the field. The proposed monitoring program shall ensure that those wells that are at the highest risk of fecal bacteriological contamination (i.e., those wells with a historical record of fecal coliform or E. coli bacteriological contamination at the well) have the highest level of monitoring. Monitoring for such wells shall consist of continuous, online chlorine residual monitoring with either automatic flow shutoff or an alarm system. The automatic flow shutoff or alarm shall be

27 28

REVISED 10-3-06

triggered by detections of chlorine levels lower than the optimal applied chlorine dose (as specified in subparagraph (6) of the interim disinfection program in Paragraph 11). Within 90 days after the Entry Date, GWA shall submit the monitoring program to EPA for approval. GWA shall provide a copy of the document concurrently to Guam EPA. Within 30 days after receipt of EPA's comments, GWA shall respond to EPA's comments in accordance with Paragraph 2, shall provide the final program to EPA and Guam EPA, and shall implement the program. GWA shall update the interim chlorine residual level monitoring program annually and as needed to reflect the development of other compliance activities and deliverables required by this Stipulated Order for Preliminary Relief, shall provide its updates to EPA for its review and approval, and shall provide a copy to Guam EPA.

B. <u>Chlorine Supply</u>: By January 31, 2007, GWA shall ensure that an adequate supply of chlorine is available on island. To satisfy this requirement, a supply of at least 200 chlorine cylinders for backup reserve shall be located on island and available to GWA upon demand. GWA may satisfy this requirement through either contract agreement(s) and/or the acquisition of the chlorine cylinders. By January 31, 2007, GWA shall provide to EPA and Guam EPA a copy of the contract agreement(s) and/or documentation of the acquisition of chlorine cylinders.

C. <u>Upgrade of Groundwater Chlorination System Project</u>: By October 30, 2006, GWA shall submit a revised workplan and schedule for finalizing the design and construction work of the Upgrade of Groundwater Chlorination System Project. (U.S. EPA Grant XP-97931501-2.) The schedule shall include key milestones for reviews, contractor selection, design, bid phase, and construction phase. GWA shall complete the Upgrade of Groundwater Chlorination System Project by April 1, 2007. GWA shall submit the 90% design to EPA for review and comments. GWA shall provide a copy of the documents concurrently to Guam EPA. Within 30 days after receipt of EPA's comments,

REVISED 10-3-06

GWA shall respond to EPA's comments in accordance with Paragraph 2, shall provide the final schedule and scope of work to EPA and Guam EPA, and shall perform the required tasks in accordance with the schedule set out in the final scope of work.

13. Leak Detection and Response Program: GWA shall develop a program for identifying and responding to leaks in the three public water systems. Within 180 days after the Entry Date, GWA shall submit the proposed program to EPA for approval. GWA shall provide a copy of the document concurrently to Guam EPA. Within 30 days after receipt of EPA's comments, GWA shall respond to EPA's comments in accordance with Paragraph 2, shall provide the final program to EPA and Guam EPA, and shall implement the program.

10 14. Water Meter Improvement Program: GWA shall develop a water meter 11 improvement program to ensure that, by November 30, 2007, each connection to the three public 12 water systems has an accurate and accessible water meter that is read monthly and used for 13 billing. Within 90 days after the Entry Date, GWA shall submit the program to EPA for 14 approval. GWA shall provide a copy of the document concurrently to Guam EPA. Within 30 15 days after receipt of EPA's comments, GWA shall respond to EPA's comments in accordance 16 with Paragraph 2, shall provide the final program to EPA and Guam EPA, and shall implement 17 the program.

18 15. Parts Inventory for POTW and Public Water Systems: Within 180 days after the
19 Entry Date, GWA shall develop and maintain a 60-day operation and maintenance parts
20 inventory for its POTW and public water systems that includes any spare parts that may
21 reasonably be needed, and shall provide EPA and Guam EPA with a written list of the parts

24 [Rest of page deliberately left blank.]

28 REVISED 10-3-06

1

2

3

4

5

6

7

8

9

22

23

25

26

inventory. The inventory need not include any parts for which GWA has a written guarantee of
 their availability within four days of a request. GWA shall provide a written report to EPA and
 Guam EPA within 180 days after the Entry Date on the adequacy of its parts inventory, including
 written guarantees of availability. On or before January 28 and July 28 of each year, GWA shall
 provide a semiannual written report to EPA and Guam EPA regarding the adequacy of its parts
 inventory.

Routine Maintenance and Repairs for POTW and Public Water Systems: Within 7 16. 180 days after the Entry Date, GWA shall: (1) provide EPA and Guam EPA with a written 8 9 report describing the minimum tools and equipment needed for each facility and maintenance 10 area in its POTW or three public water systems to handle any routine maintenance or repair 11 work; and (2) ensure that each facility and maintenance area in its POTW or three public water 12 systems has the necessary tools and equipment. At a minimum, GWA shall ensure that the 13 following systems are included in the report and have the necessary tools and equipment: sewage 14 treatment plants, wastewater collection systems, wastewater conveyance systems (including the 15 sewage pump stations), water treatment plant, water distribution systems, drinking water wells, 16 and chlorination systems.

17 17. Standby Generators: GWA shall ensure that working, appropriately sized, 18 standby generators are available for all wastewater pump stations, treatment plants, and wells that 19 are critical to the three public water systems. Within 90 days after the Entry Date, GWA shall submit a list to EPA for approval, indicating the size of the standby generator for each pump 20 21 station, treatment plant or well and the schedule of compliance. GWA shall provide a copy of 22 the document concurrently to Guam EPA. Within 30 days after receipt of EPA's comments, 23 GWA shall respond to EPA's comments in accordance with Paragraph 2 and shall provide the final list to EPA and Guam EPA. By November 30, 2006, GWA shall supply standby generators 24 25 for all critical wells, wastewater pump stations, and treatment plants.

26 27

28 REVISED 10-3-06

18.

15

Underground Storage Tanks: GWA shall prepare an inventory of its underground

storage tanks, indicating which tanks are no longer in use. For any tank that is no longer in use, 1 GWA shall perform the following temporary closure tasks: (1) empty all materials from the tank 2 to within one inch of the tank bottom; (2) leave vent lines open; and (3) secure all lines, pumps, 3 manways, and ancillary equipment with a lock. Within 90 days after the Entry Date, GWA shall 4 provide the inventory to EPA for review and approval, stating the date that GWA has completed 5 the temporary closure tasks for any tanks no longer in use. GWA shall provide a copy of the 6 document concurrently to Guam EPA. Within 30 days after receipt of EPA's comments, GWA 7 shall respond to EPA's comments in accordance with Paragraph 2, shall provide the final 8 inventory to EPA and Guam EPA, and shall perform any additional required tasks in accordance 9 with the schedule set out in the final inventory. 10

11 19. Emergency Response Plan: GWA shall develop an emergency response plan that 12 provides operating procedures for all employees during and following any disasters, including, 13 but not limited to, typhoons and earthquakes. Within 540 days after the Entry Date, GWA shall 14 submit the plan to EPA for approval. GWA shall provide a copy of the document concurrently to 15 Guam EPA. Within 30 days after receipt of EPA's comments, GWA shall respond to EPA's 16 comments in accordance with Paragraph 2, shall provide the final plan to EPA and Guam EPA, 17 and shall implement the plan.

20. Preventive Maintenance Program: GWA shall develop a preventive maintenance 18 program for the POTW and public water systems that details required maintenance, schedules. 19 standard procedures, tracking, and reporting. At a minimum, GWA shall develop preventive 20 maintenance programs for the following systems: sewage treatment plants, wastewater collection 21 systems, wastewater conveyance systems (including the sewage pump stations), water treatment 22 plant, water distribution systems, drinking water wells, and chlorination systems. Within one 23 vear after the Entry Date, GWA shall submit the program to EPA for approval. GWA shall 24 provide a copy of the document concurrently to Guam EPA. Within 30 days after receipt of 25 EPA's comments, GWA shall respond to EPA's comments in accordance with Paragraph 2, 26

shall provide the final program to EPA and Guam EPA, and shall implement the program. GWA shall update the program annually and as needed to reflect the development of other compliance 2 activities and deliverables required by this Stipulated Order for Preliminary Relief, shall provide 3 its updates to EPA for its review and approval, and shall provide a copy to Guam EPA. 4

Operations and Maintenance Manuals: GWA shall develop a set of 5 21. comprehensive Operations and Maintenance Manuals for its POTW and public water systems. 6 At a minimum, GWA shall develop Operations and Maintenance Manuals for the following 7 systems: sewage treatment plants, wastewater collection systems, wastewater conveyance 8 systems (including the sewage pump stations), water treatment plant, water distribution systems. 9 drinking water wells, and chlorination systems. Within 180 days after the Entry Date, GWA 10 shall submit to EPA a schedule for completing the manuals and submitting them to EPA for 11 approval. GWA shall provide a copy of the document concurrently to Guam EPA. All manuals 12 shall be completed and submitted to EPA and Guam EPA within 2 years after the Entry Date. 13 The manuals shall include: (1) information on all relevant process design assumptions such as 14 design flows, pump capacities, detention times, surface loadings, oxygen transfer requirements. 15 disinfection requirements, water transmission requirements, simplified schematic diagrams of 16 pipelines and control systems, and detailed diagrams for more complicated components; (2) unit 17 process information, including control measures and monitoring procedures needed to achieve 18 19 maximum efficiency and reliability and a clear explanation of process functions of various components with simplified language and references to appropriate technical manuals; (3) start-20 up and shutdown procedures; (4) maintenance schedules; (5) laboratory test procedures, 21 including the necessary quality assurance and reporting requirements; (6) safety procedures: 22 (7) organizational structure, job descriptions, and duties; (8) administrative procedures for 23 purchase order preparation approvals and budget preparation; and (9) an operating plan for 24 emergencies. Within 30 days after receipt of EPA's comments, GWA shall respond to EPA's 25 comments in accordance with Paragraph 2, shall provide a copy of the final manuals to EPA and 26

27 28

Guam EPA, shall distribute the manuals to the appropriate employees, and shall require use of the manuals as part of its standard operating procedures for its POTW and public water systems. GWA shall update the manuals as needed to reflect the development of other compliance activities and deliverables required by this Stipulated Order for Preliminary Relief, shall provide 4 its updates to EPA for its review and approval, and shall provide a copy to Guam EPA. 5

6 22. <u>GWA's Authority</u>: In order to function properly and efficiently as an independent 7 agency, GWA needs to have the ability to independently: administer financial accounts, make 8 personnel changes, and procure equipment and services (including both engineering services and 9 the direct procurement of services or supplies from off-island companies). Within 30 days after the Entry Date, Defendants shall provide a report to EPA on any legal and administrative actions 10 necessary to allow GWA to operate independently, and shall recommend a course of action, 11 including proposed legislation or administrative measures, to deal with these issues. GWA shall 12 13 provide a copy of the document concurrently to Guam EPA. Within 30 days after receipt of EPA's comments on the report, Defendants shall respond to EPA's comments in accordance with ÷ Paragraph 2 and shall take action to address these issues, including submitting proposed 15 legislation to the Guam Legislature and/or implementing required administrative measures. 16

17 23. Standard Operating Procedures: GWA shall develop: (1) a set of standard operating procedures for the following processes: architectural and engineering services 18 procurement, construction services procurement, and tools and equipment inventory and 19 controls; and (2) procedures for complying with federal and local laws and monitoring 20 compliance. The standard operating procedures shall require GWA to comply with applicable 21 Guam procurement statutes and other applicable local laws. Within 180 days after the Entry 22 Date, GWA shall submit the draft procedures to EPA for review and approval. GWA shall 23 provide a copy of the document concurrently to Guam EPA. Within 30 days after receipt of 24 EPA's comments, GWA shall respond to EPA's comments in accordance with Paragraph 2, shall 25 provide the final procedures to EPA and Guam EPA, and shall implement the procedures. 26

27

1

2

3

124.Vulnerability Assessment: Within 180 days after the Entry Date, GWA shall2submit a completed vulnerability assessment along with a certification of its completion, as3required by Section 1433(a) of the SDWA, to the EPA Administrator in Washington, D.C.4GWA shall follow the mailing protocol described in EPA's "Instructions to Assist Community5Water Systems in complying with the Public Health Security and Bioterrorism Preparedness and6Response Act of 2002," which is located on the EPA website as follows:

7 http://www.epa.gov/safewater/security/util-inst.pdf.

The completed vulnerability assessment should not be sent to EPA Region 9 in San 8 9 Francisco. Concurrently with the submission of the vulnerability assessment to the EPA Administrator, GWA shall notify EPA pursuant to Paragraph 50 that the requirements of SDWA 10 Section 1433(a) have been met and that GWA is in compliance with Section 1433(a). Within 11 12 180 days after the submission of the vulnerability assessment, GWA shall complete an 13 emergency response plan and certify to the EPA Administrator that it has completed the plan in accordance with the requirements of SDWA Section 1433(b) and (c). Within 10 working days 14 after completing the plan, GWA shall also notify EPA pursuant to Paragraph 50 that it has 15 completed the emergency response plan. 16

17

18

25. <u>Trade Organizations</u>: Within 90 days after the Entry Date, GWA shall join the American Waterworks Association and the Water Environment Federation.

19

IV. Financial Administration at GWA

26. <u>Financial Standard Operating Procedures</u>: GWA shall develop a set of standard
operating procedures for the following processes: fiscal management and controls, budgeting,
accounting, and financial planning. Within one year after the Entry Date, GWA shall submit a
copy of the procedures to EPA for review and approval. Within 30 days after receipt of EPA's
comments, GWA shall respond to EPA's comments in accordance with Paragraph 2, shall
provide the final procedures to EPA, and shall implement the procedures.

26 27

28

27. <u>Annual Budget</u>: GWA shall submit each approved annual budget to EPA. The

annual budget shall ensure adequate financing of the operation and maintenance of GWA's 1 POTW and three public water systems. The budget shall include, but not be limited to, the 2 following: (1) a budget detailing the total projected costs for the coming year of operating, 3 maintaining, and repairing the POTW and the three public water systems, including staffing, 4 energy, materials and supplies, repairs, replacements, maintaining Financial Reserves required in 5 Paragraph 32 below, and all other expenses; (2) a detailed schedule of user fees, taxes, 6 assessments or other sources of revenue sufficient to meet the projected costs as set forth in the 7 budget for the coming year, including increases or adjustments required to meet that budget; and 8 (3) a financial management plan insuring that all user fees, taxes, assessments or other sources of 9 revenue collected for the POTW and three public water systems are in fact applied to their 10 operation, maintenance, repair, and replacement. 11

Interim Financial Plan: Within 120 days after the Entry Date, GWA shall develop 28. 12 and submit to EPA and the PUC an interim financial plan that details how revenue will be 13 generated for the interim period before the final financial plan in the Master Plan is complete. 14 approved, and implemented. Revenues shall be sufficient to cover the cost of compliance 15 activities and deliverables required by this Stipulated Order for Preliminary Relief, as well as any 16 other anticipated expenses during the period before the final financial plan is approved, including 17 all existing debt and expected debt service, and the buildup of the Financial Reserves required in 18 Paragraph 32 below. The interim financial plan shall include a restructured user fee system. 19 GWA shall coordinate with the PUC to ensure that: (1) GWA complies with the public 20 notification requirements for proposed rate increases in 12 GCA §§ 12001.1, 12001.2; and 21 (2) GWA's filings for rate increases are made in accordance with applicable PUC regulations. 22

23 29. <u>Approval of Interim Financial Plan</u>: Within 90 days after GWA submits an
interim financial plan, the PUC shall consider and approve an interim financial plan that
generates enough revenue to cover the cost of compliance activities and deliverables required by
this Stipulated Order for Preliminary Relief, as well as any other anticipated expenses during the

27

28

period before the final financial plan is approved, including all existing debt and expected debt
 service, and the buildup of the Financial Reserves required in Paragraph 32 below. GWA shall
 submit to EPA the interim financial plan approved by the PUC within ten working days after
 approval, and shall implement the plan upon approval by the PUC.

Approval of Final Financial Plan: Within 120 days after GWA submits a final 30. 5 financial plan in the Master Plan, the PUC shall consider and approve a final financial plan that 6 generates enough revenue to cover the cost of all compliance activities and deliverables required 7 8 by this Stipulated Order for Preliminary Relief, as well as any other anticipated expenses, 9 including any measures necessary to ensure compliance with the CWA and the SDWA, costs 10 related to the infrastructure improvements identified in the Master Plan, all related operations and maintenance costs, and corresponding utility expenses, including maintenance of all Financial 11 12 Reserves required in Paragraph 32 below. GWA shall submit to EPA a copy of the final financial plan approved by the PUC within ten working days after approval, and shall implement 13 the plan upon approval by the PUC. 14

15 31. Five-Year Plan: On an annual basis, GWA shall submit to EPA a detailed fiveyear plan for financing the continued operation, maintenance, and repair of the POTW and the 16 17 three public water systems. Each five-year plan shall include: (1) estimated annual budgets for each of the next five years for all costs of operating, maintaining, and repairing GWA's POTW 18 19 and three public water systems, including the establishment and maintenance of the Financial Reserves listed in Paragraph 32 below; and (2) a detailed descriptive plan for raising sufficient 20 21 revenue to meet the projected cost as outlined in the budgets, including adjustments or increases in user fees, taxes, assessments or other sources of revenue. GWA shall submit its first five-year 22 plan to EPA within 2 years after the Entry Date. EPA will review each five-year plan and may 23 request additions, deletions, changes or modifications as it deems necessary to insure adequate 24 funding of the operation, maintenance, and repair of GWA's POTW and three public water 25 systems for the five-year period. Within 30 days after receipt of EPA's comments, GWA shall 26

27 28

REVISED 10-3-06

respond to EPA's comments in accordance with Paragraph 2 into a final five-year plan, shall
 provide the final plan to EPA, and shall implement the measures of the plan.

3 32. <u>Financial Reserves</u>: Within 180 days after the Entry Date, GWA shall begin
4 developing the following Financial Reserves:

(1) <u>Debt Service Reserve</u> - This reserve shall be established and maintained in accordance with bond covenants and debt service covenants. Within 30 days after issuing a bond or securing a loan, GWA shall submit to EPA information regarding the amount of this reserve.

(2) Emergency Operations, Maintenance, Renovation, and Replacement Reserve - This reserve shall be equal to three months of budgeted expenses for operations, maintenance, renovation, and replacement of GWA's POTW and three public water systems. Within 90 days after the Entry Date, GWA shall submit to EPA for approval the proposed amount of this reserve. GWA shall make monthly deposits to the reserve to ensure that the balance matches current needs based on the amounts budgeted for each succeeding fiscal year. The expense base used to calculate this reserve shall include operating and maintenance expenses, including the depreciation expense, plus any capital projects or purchases funded with GWA revenues. The reserve shall be used only to cover operations and maintenance expenses not in the original budget. This reserve can be replaced by the availability of an equivalent emergency line of credit.

The above reserves shall be fully developed within 2 years after the Entry Date and shall be used only for the stated purposes, and only in the event that no other revenue is available to meet the commitments. If GWA draws down on any reserve at any time, it shall rebuild that reserve to the required level within 180 days. On or before January 28 of each year, GWA shall submit an annual report to EPA regarding the development and maintenance of the Financial Reserves required by this Paragraph.

33. <u>Late Payments</u>: GWA shall develop a program that:

28 REVISED 10-3-06

(1) clearly defines how late payments will be addressed and when service will be discontinued. GWA shall consider measures such as discontinuing service for any customer that is more than 60 days behind in payments.

(2) provides for a procedure to collect delinquent rates or charges, and to enforce liens, if any, for non-payment of rates or charges, in a practical and timely manner.

Within 90 days after the Entry Date, GWA shall submit the program to EPA for approval. Within 30 days after receipt of EPA's comments, GWA shall respond to EPA's comments in accordance with Paragraph 2, shall provide the final program to EPA, and shall implement the program.

Sewer Hook-up Revolving Fund: GWA shall develop a program instituting a 10 34. 11 sewer hook-up revolving fund for residents currently required to connect to the wastewater 12 collection system. The program shall be designed to allow residents to spread hook-up costs 13 (including utility fees) over two or more years at low or no interest. GWA shall use, at a 14 minimum, funds provided by the Guam EPA Water Planning Committee. Within 540 days after 15 the Entry Date, GWA shall submit the program to EPA for approval. Within 30 days after 16 receipt of EPA's comments, GWA shall respond to EPA's comments in accordance with 17 Paragraph 2, shall provide the final program to EPA, and shall implement the program.

Construction and Rehabilitation Projects at GWA

19 35. Agana Ocean Outfall: GWA shall develop: (1) a schedule for submitting pre-20 final (90 percent) and final (100 percent) ocean outfall extension designs and detailed 21 construction schedules for the Agana Sewage Treatment Plant ("STP"); and (2) a scope of work 22 and schedule for initiating and completing a baseline monitoring survey or surveys in the area of 23 the proposed ocean outfall extension to support GWA's revised CWA Section 301(h) application 24 and to establish a basis for the Agana NPDES monitoring program. The schedule shall require 25 GWA to complete construction of the outfall by January 1, 2008. The baseline monitoring 26 survey or surveys shall: (1) include water quality data, quantitative information on the benthic

27

28 REVISED 10-3-06

1 fauna, and sediment quality data in the area of the proposed discharge; and (2) be performed similarly to the initial baseline monitoring survey for the proposed ocean outfall 2 extension. Within 60 days after the Entry Date, GWA shall submit to EPA for review and 3 4 approval the scope of work and schedules required by this Paragraph. GWA shall provide a copy 5 of the documents concurrently to Guam EPA. Within 30 days after receipt of EPA's comments, GWA shall respond to EPA's comments in accordance with Paragraph 2, shall provide the final 6 scope of work and schedules to EPA and Guam EPA, and shall perform the required tasks in 7 accordance with the schedules set out in the final scope of work. 8

9 36. Northern District Ocean Outfall: GWA shall develop: (1) a schedule for 10 submitting pre-final (90 percent) and final (100 percent) ocean outfall extension designs and 11 detailed construction schedules for the Northern District STP; and (2) a scope of work and 12 schedule for initiating and completing a baseline monitoring survey or surveys in the area of the proposed ocean outfall extension to support GWA's revised CWA Section 301(h) application 13 14 and to establish a basis for the Northern District NPDES monitoring program. The schedule shall require GWA to complete construction of the outfall by January 1, 2009. The baseline 15 monitoring survey or surveys shall: (1) include water quality data, quantitative information on 16 17 the benthic fauna, and sediment quality data in the area of the proposed discharge; and (2) shall be performed similarly to the initial baseline monitoring survey for the proposed ocean outfall 18 19 extension. Within 60 days after the Entry Date, GWA shall submit to EPA for review and 20 approval the scope of work and schedules required by this Paragraph. GWA shall provide a copy 21 of the documents concurrently to Guam EPA. Within 30 days after receipt of EPA's comments, 22 GWA shall respond to EPA's comments in accordance with Paragraph 2, shall provide the final 23 scope of work and schedules to EPA and Guam EPA, and shall perform the required tasks in 24 accordance with the schedules set out in the final scope of work.

25 26

28 REVISED 10-3-06

37.

24

Conveyance System: GWA shall retain a qualified engineering firm to perform an engineering

Assessment of Chaot Wastewater Pump Station and Sewer Collection and

assessment of the Chaot/Marine Drive sewer collection and conveyance system (the "Chaot 1 engineering assessment"). The scope of the Chaot engineering assessment shall include an area 2 sufficiently upstream of the old Chaot sewer pump station to fully assess the capacity and piping 3 of the system to prevent raw sewage overflows at the Chaot sewer pump station and downstream 4 along Routes 4 and 1 to the Agana Main sewer pump station. It shall also include an operational 5 6 re-evaluation of the new Chaot sewer pump station. The Chaot engineering assessment shall identify any capacity, design, inflow/infiltration, and operational deficiencies, and include the 7 8 development of a corrective action plan and schedule for implementation. The corrective action 9 plan and schedule shall include, but not be limited to, prioritization of projects, as may be 10 necessary, and time frames for developing a scope of work, completing the design, and 11 commencing and completing construction of all deficiencies identified in the corrective action 12 plan. Within 180 days after the Entry Date, GWA shall submit to EPA for review and approval 13 the Chaot engineering assessment. GWA shall provide a copy of the document concurrently to 14 Guam EPA. Within 30 days after receipt of EPA's comments, GWA shall respond to EPA's 15 comments in accordance with Paragraph 2, shall provide the final Chaot engineering assessment 16 (including the final corrective action plan) to EPA and Guam EPA, and shall perform the 17 required tasks in accordance with the schedule set out in the final corrective action plan. Within 18 180 days after the final engineering assessment is completed, GWA shall submit to EPA for 19 review and approval the Chaot engineering design. GWA shall provide a copy of the document 20 concurrently to Guam EPA. Within 30 days after receipt of EPA's comments, GWA shall 21 respond to EPA's comments in accordance with Paragraph 2 and shall provide the final Chaot 22 engineering design to EPA and Guam EPA. Construction shall be completed within 540 days 23 after the Chaot engineering design is approved by EPA.

28 REVISED 10-3-06

38.

Transmission Line Construction ("WTLC") Plan to ensure its ability to adequately treat

A. Water Transmission Line Construction Plan: GWA shall develop a Water

Water Transmission Lines and Reservoirs

its well sources (including disinfection). The WTLC Plan shall include an assessment of the existing well configuration, including a discussion of CT values currently required and currently achieved under the existing configuration in accordance with the requirements of Paragraph 11 (Interim Disinfection Program). Based on the assessment of the current well configuration, GWA shall make recommendations regarding the need for dedicated transmission lines in its three public water systems, as well as recommendations concerning future treatment, including chlorination/disinfection configurations, for the three public water systems. The WTLC Plan shall prioritize the construction of transmission lines and any necessary chlorination/disinfection configurations to ensure adequate treatment based on the following information about the different parts of the public water systems: (1) the current level of disinfection achieved (the CT values), and (2) the history of bacteriological contamination of the sources, such as the wellfield history. The WTLC Plan shall include a schedule for developing and finalizing a scope of work and design, and commencing and completing construction and upgrades to the water transmission lines and chlorination systems. Within 180 days after the Entry Date, GWA shall submit to EPA for review and approval the WTLC Plan. GWA shall provide a copy of the document concurrently to Guam EPA. Within 30 days after receipt of EPA's comments, GWA shall respond to EPA's comments in accordance with Paragraph 2, shall provide the final WTLC Plan to EPA and Guam EPA, and shall perform the required tasks in accordance with the schedule set out in the final WTLC Plan.

B. <u>Sinajana Water Transmission Line Project</u>: By September 30, 2006, GWA shall submit a revised workplan and schedule for finalizing the design and construction work of the Sinajana Water Transmission Line Project. (U.S. EPA Grant FS-97911902-2.)
The schedule shall include key milestones for reviews, contractor selection, design, bid phase, and construction phase. GWA shall complete the Sinajana Water Transmission

Line Project by June 30, 2008. GWA shall submit the 90% design per the described project scope of work dated June 2, 2005 (Phases I, II and III) to EPA for review and comments. GWA shall provide a copy of the documents concurrently to Guam EPA. Within 30 days after receipt of EPA's comments, GWA shall respond to EPA's comments in accordance with Paragraph 2, shall provide the final schedule and scope of work to EPA and Guam EPA, and shall perform the required tasks in accordance with the schedule set out in the final scope of work.

C. Water Reservoirs Condition Assessment: By October 31, 2006, GWA shall submit a workplan and a schedule to complete a condition assessment to determine the structural stability and soundness of all steel tank water reservoirs. The condition assessment shall include an internal and external structural inspection of each reservoir, and shall include recommendations regarding the necessary course of action to monitor, rehabilitate, or replace each reservoir. The condition assessment shall be performed by a qualified structural engineer in accordance with industry standards established by the American Water Works Association and the Steel Tank Institute. GWA shall provide to EPA and Guam EPA a copy of the workplan and schedule for review and comments. Within 30 days after receipt of EPA's comments, GWA shall respond to EPA's comments in accordance with Paragraph 2. After EPA approves a workplan and schedule, GWA shall perform the required tasks in accordance with the schedule set out in the final workplan.

23 [Rest of page deliberately left blank]

REVISED 10-3-06

26A

39. Northern District STP Renovation: GWA shall implement corrective actions to 1 2 restore primary treatment operational capacity to the Northern District STP. The corrective actions shall include, but not be limited to, the following: primary clarifiers, preaeration and 3 aerated grit removal systems, and installation of primary sludge pumps and solids handling (as 4 5 necessary). GWA shall complete the corrective actions to restore primary treatment operational 6 capacity by March 2, 2007. After completion of the corrective actions to restore primary 7 treatment, GWA shall conduct an operational performance evaluation by May 4, 2007, to 8 determine whether advanced primary treatment is needed to comply with NPDES permit effluent 9 limitations. By May 4, 2007, GWA shall submit to EPA and Guam EPA for review and 10 comments the operational performance evaluation with a determination of the need for advanced 11 primary treatment. Within 30 days after receipt of EPA's comments, GWA shall respond to EPA's comments in accordance with Paragraph 2. If advanced primary treatment is needed, the 12 submitted operational performance evaluation shall include a schedule for the design and 13 14 installation of the advanced primary treatment system. GWA shall perform the required tasks in accordance with the schedule set out in the operational performance evaluation. 15

16 40. Agana Main Sewage Pump Station: GWA shall develop a schedule to stop 17 overflows of raw sewage from the Agana Main Sewage Pump Station. The schedule shall include time frames for developing and completing a scope of work, design, and construction. 18 19 The schedule shall require construction to be completed within 300 days after the Entry Date. 20 Within 60 days after the Entry Date, GWA shall submit to EPA for review and approval the 21 schedule required by this Paragraph. GWA shall provide a copy of the document concurrently to 22 Guam EPA. Within 30 days after receipt of EPA's comments, GWA shall respond to EPA's 23 comments in accordance with Paragraph 2, shall provide the final schedule to EPA and Guam 24 EPA, and shall perform the required tasks in accordance with the final schedule.

41. <u>Ugum Surface Water Treatment Plant</u>: GWA shall develop a scope of work and
schedule for the rehabilitation, renovation and/or design and construction of new (alternative)

27

28 REVISED 10-3-06

1 treatment facilities of the Ugum Surface Water Treatment Plant to bring the plant into 2 compliance with SDWA requirements and performance standards. The scope of work shall 3 detail all rehabilitation, renovation, and/or recommended design and construction of new (alternative) treatment work to be performed based on the findings of the CPE of the Ugum 4 5 Surface Water Treatment Plant prepared for GWA by Belanger and Associates and International Studies & Training Institute, Inc., in May 2001. The scope of work may include other 6 7 documentation or studies needed to determine the extent of the rehabilitation and renovation needs of the existing plant, and/or may include alternative water treatment feasibility or 8 9 preliminary engineering studies deemed by GWA to be necessary to determine if other 10 alternative treatment design and construction projects may be preferable and/or feasible to bring 11 the plant into full compliance with all SDWA requirements. The schedule shall include, but not 12 be limited to, time frames for developing and completing all activities contained in the scope of 13 work, any additional studies needed to determine the preferred course of action 14 (rehabilitation/renovation or alternative treatment design and construction), design, and 15 construction. The schedule shall require construction to be completed by January 5, 2008. 16 Within 90 days after the Entry Date, GWA shall submit to EPA for review and approval the 17 scope of work and schedule required by this Paragraph. GWA shall provide a copy of the documents concurrently to Guam EPA. Within 30 days after receipt of EPA's comments, GWA 18 19 shall respond to EPA's comments in accordance with Paragraph 2, shall provide the final scope 20 of work and schedule to EPA and Guam EPA, and shall perform the required tasks in accordance 21 with the schedule set out in the final scope of work.

42. <u>Agana STP Renovation</u>: GWA shall implement corrective actions to restore
primary treatment operational capacity to the Agana STP and shall renovate the grit
removal/screening system and wet well at the Agana Main Sewer Pump Station ("SPS"). GWA
shall complete the corrective actions to restore the primary treatment operational capacity of the
Agana STP by March 2, 2007, and shall complete renovations at the Agana Main SPS by June 1,

27

28 REVISED 10-3-06

2007. After completion of the corrective actions to restore full primary treatment, GWA shall 1 conduct an operational performance evaluation by April 30, 2007, to determine whether 2 advanced primary treatment is needed to comply with NPDES permit effluent limitations. GWA 3 4 shall submit to EPA and Guam EPA for review and comments the operational performance evaluation with a determination of the need for advanced primary treatment. Within 30 days 5 after receipt of EPA's comments, GWA shall respond to EPA's comments in accordance with 6 Paragraph 2. If advanced primary treatment is needed, the submitted operational performance 7 evaluation shall include a schedule for the design and installation of the advanced primary 8 treatment system. GWA shall perform the required tasks in accordance with the schedule set out 9 10 in the operational performance evaluation.

11

Agat, Baza Gardens, and Umatac-Merizo STPs Renovations and/or Expansions: 43. GWA shall develop a schedule for the performance of CPEs of the Agat, Baza Gardens, and 12 Umatac-Merizo STPs to identify performance-limiting factors and recommended improvements 13 needed to bring each of these STPs into compliance with their respective NPDES permit 14 requirements. The CPEs shall be performed by a qualified engineering firm experienced in 15 performing a CPE for wastewater treatment facilities. Each CPE shall be performed in 16 accordance with EPA guidelines for performing a CPE as described in the following 17 publications: Handbook: Optimizing Water Treatment Plant Performance Using the Composite 18 19 Correction Program (CCP) (EPA/625/6-91/027, August 1998); and Handbook: Improving POTW Performance Using the Composite Correction Program Approach (EPA-625/6-84-008, 20 October 1984), or a later publication if available. The schedule shall include time frames for the 21 following: (1) developing and completing a scope of work, initiating and completing the CPEs, 22 and submitting draft CPEs for the three STPs within one year after the Entry Date; and 23 (2) completion of the final CPEs for the three STPs by September 5, 2004. Within 90 days after 24 the Entry Date, GWA shall submit to EPA for review and approval the schedule required by this 25 Paragraph. GWA shall provide a copy of the document concurrently to Guam EPA. Within 30 26

27

28 **REVISED 10-3-06**

days after receipt of EPA's comments, GWA shall respond to EPA's comments in accordance with Paragraph 2, shall provide the final schedule to EPA and Guam EPA, and shall perform the 3 required tasks in accordance with the final schedule.

Santa Rita Spring Booster Pump Station Rehabilitation: GWA shall develop: 44. 4 5 (1) a schedule for commencing and completing the design and construction work for the Santa Rita Spring Booster Pump Station ("BPS") rehabilitation; and (2) a revised scope of work for the 6 7 Santa Rita Spring BPS rehabilitation. The schedule shall require GWA to complete construction by July 1, 2007. The scope of work shall include the performance of a hydraulic analysis, by the 8 selected engineering design firm, of the Santa Rita Spring flow volume to ensure that all critical 9 10 components such as pumps, motors, piping, etc. are sized appropriately. Within 210 days after the Entry Date, GWA shall submit to EPA for review and approval the schedule and scope of 11 work required by this Paragraph. GWA shall provide a copy of the documents concurrently to 12 Guam EPA. Within 30 days after receipt of EPA's comments, GWA shall respond to EPA's 13 14 comments in accordance with Paragraph 2, shall provide the final schedule and scope of work to 15 EPA and Guam EPA, and shall perform the required tasks in accordance with the schedule set out in the final scope of work. 16

17 45. Rehabilitation/Replacement of Drinking Water Wells: GWA shall develop a Drinking Water Wells Rehabilitation/Replacement ("DWWR") Plan for all of its drinking water 18 wells. The DWWR Plan shall include: (1) a detailed assessment of all of GWA's wells to 19 determine which wells require either rehabilitation or replacement; (2) criteria for prioritizing the 20 21 rehabilitation or replacement of wells, which will identify the most critical wells, taking into 22 consideration factors such as well capacity, operating records, any historical record of 23 bacteriological contamination at a well, and the presence or imminent threat of bacteriological contamination and other contamination; and (3) time frames for developing and finalizing a 24 25 scope of work and design, as well as for commencing and completing rehabilitation or replacement of the wells. GWA shall schedule all required work in two phases. The first phase 26

27 28

1

2

REVISED 10-3-06

of work shall focus on the most critical wells identified in the DWWR Plan and shall require 1 2 rehabilitation and/or replacement of those critical wells within 2 years after the Entry Date. The second phase of work shall include all other wells identified in the DWWR Plan and shall require 3 rehabilitation and/or replacement of those wells within five years after the Entry Date. Within 4 120 days after the Entry Date, GWA shall submit the DWWR Plan to EPA for review and 5 approval. GWA shall provide a copy of the document concurrently to Guam EPA. Within 30 6 7 days after receipt of EPA's comments, GWA shall respond to EPA's comments in accordance with Paragraph 2, shall provide the final DWWR Plan to EPA and Guam EPA, and shall perform 8 the required tasks in accordance with the schedule set out in the final DWWR Plan. 9

10

27

28

VI. <u>Training at GWA</u>

Operator Training: GWA shall develop an operator training program that 11 46. provides all POTW and public water system operators with information about the proper 12 operation and maintenance of the treatment, disinfection, and conveyance systems. Within 180 13 days after the Entry Date, GWA shall submit the program to EPA for approval, GWA shall 14 provide a copy of the document concurrently to Guam EPA. Within 30 days after receipt of 15 EPA's comments, GWA shall respond to EPA's comments in accordance with Paragraph 2, shall 16 17 provide the final program to EPA and Guam EPA, and shall implement the operator training program. 18

47. Other Training: GWA shall develop an ongoing training program for appropriate 19 staff in at least the following areas: utility management, financial administration, and planning. 20 GWA shall also offer the CCU training on risk mitigation and other appropriate and available 21 Board Trainings. Within one year after the Entry Date, GWA shall submit the program to EPA 22 for approval. GWA shall provide a copy of the document concurrently to Guam EPA. Within 30 23 days after receipt of EPA's comments, GWA shall respond to EPA's comments in accordance 24 with Paragraph 2, shall provide the final program to EPA and Guam EPA, and shall implement 25 the training program. 26

10

11

VII. **Reporting Requirements and Notice Provisions**

Notice of Noncompliance or Delay: If GWA becomes aware that it will not meet, 48. or it is not likely to meet, any completion date for any compliance activity or deliverable required by this Stipulated Order for Preliminary Relief, or that it is not in compliance with a requirement of this Stipulated Order for Preliminary Relief, GWA shall submit written notification to the United States and EPA within one week of when GWA's General Manager becomes aware of 6 7 such expected delay or noncompliance. The notice shall contain the following information: a description of the noncompliance or the expected delay, the reason for the noncompliance or the 8 expected delay, an estimate of how much additional time is needed to complete the affected compliance activity or deliverable or to come into compliance, and a statement describing all steps taken to minimize the noncompliance or delay.

49. <u>Compliance Progress Reports:</u> GWA shall submit quarterly compliance progress 12 reports to EPA and Guam EPA and make them available to the general public. The first 13 quarterly progress report shall include a compliance schedule for all compliance activities and 14 deliverables required by this Stipulated Order for Preliminary Relief. Quarterly compliance 15 progress reports shall include, but not be limited to, the following: GWA's progress toward 16 completing compliance activities and deliverables required by this Stipulated Order for 17 Preliminary Relief; reporting of compliance and/or noncompliance with schedules established for 18 specific compliance activities and deliverables; explanations of noncompliance and actions taken 19 or to be taken to address noncompliance; and a brief discussion of the status of efforts toward 20 meeting future compliance schedule activities and deliverables required by this Stipulated Order 21 for Preliminary Relief. When the long-term financial plan is approved by the PUC, GWA shall 22 include an updated compliance schedule in the next quarterly compliance progress report that 23 includes all anticipated construction activities and related construction schedules. The quarterly 24 compliance progress report shall be due on or before January 28, April 28, July 28, and October 25 28. and shall cover activities in the preceding calendar quarter. The first quarterly compliance 26

progress report shall be due on the 28th calendar day following the first full quarter after the Entry Date.

1

2

50. Except as specified otherwise, when written notification to or communication
with GWA, the Government of Guam, EPA, or the United States is required by the terms of this
Stipulated Order for Preliminary Relief, it shall be sent via express mail or similar service with a
return receipt requested, or, in the alternative, by both fax and e-mail, and addressed as follows:

52. Any authorized representative of EPA, upon presentation of proper identification,
shall have a right of entry to GWA's POTW and three public water systems at any reasonable
time for the purpose of monitoring compliance with the provisions of this Stipulated Order for
Preliminary Relief, including, but not limited to, inspecting equipment, inspecting and copying
all records maintained by GWA, and testing and observing all discharges and drinking water.
EPA's rights of inspection and entry under this Paragraph are in addition to, and in no way limit,
EPA's rights of inspection and entry under the CWA, SDWA, or any other law.

25 IX. <u>Stipulated Penalties</u>

53. Stipulated Penalties:

a.	Defendants shall pay stipulated penalties for failure to meet deadlines
speci	fied in this Stipulated Order for Preliminary Relief as specified below:
i.	For failure to meet the deadlines specified in Paragraphs 1, 13, 18, 19, 24,
	25, 26, 33, 34, 42, 43, 44, 45, and 47:
-	\$250 per day per violation for the first 30 days, \$500 per day per violation
	for the following 30 days, and \$1,000 per day per violation for each day
	thereafter.
ii.	For failure to meet the deadlines specified in Paragraphs 3, 4, 5, 6, 7, 14,
	16, 17, 22, 23, 32, 38, 39, 40, and 46:
-	\$500 per day per violation for the first 30 days, \$1,000 per day per
	violation for the following 30 days, and \$2,000 per day per violation for
	each day thereafter.
iii.	For failure to meet the deadlines specified in Paragraphs 8, 9, 10, 11, 12,
	15, 20, 21, 27, 28, 29, 30, 31, 35, 36, 37, and 41:
-	\$1,000 per day per violation for the first 30 days, \$2,000 per day per
	violation for the following 30 days, and \$5,000 per day per violation for
	each day thereafter.
b.	Defendants shall pay stipulated penalties for failure to meet any other
requi	rements of this Stipulated Order for Preliminary Relief as follows:
-	\$250 per day per violation for the first 30 days, \$500 per day per violation
	for the following 30 days, and \$1,000 per day per violation for each day
	thereafter.
54. Stipu	lated penalties shall begin to accrue on the day after performance is due and
shall continue to acc	crue through the final date of completion even if no notice of the violation is
sent to Defendants.	Nothing herein shall prevent the simultaneous accrual of separate penalties
for separate violation	ns of this Stipulated Order for Preliminary Relief.
REVISED 10-3-06	35
	REVISED 10-3-06

55. Any stipulated penalty accruing pursuant to this Stipulated Order for Preliminary Relief shall be payable upon demand and due not later than 30 days after Defendants' receipt of EPA's written demand. Defendants shall pay the amount owed to the United States pursuant to this Stipulated Order for Preliminary Relief by certified or cashier's check in the amount due payable to the "U.S. Department of Justice," referencing DOJ No. 90-5-1-1-07942 and United States Attorney's Office file number 2002V00100, and delivered to the office of the United States Attorney, District of Guam, Attention: Financial Litigation Unit, Suite 500, Sirena Plaza, 108 Hernan Cortez, Hagatna, Guam 96910.

9 56. The United States may, in the unreviewable exercise of its discretion, reduce or
10 waive stipulated penalties otherwise due it under this Stipulated Order for Preliminary Relief.

57. If Defendants fail to pay stipulated penalties owed pursuant to this Stipulated
Order for Preliminary Relief within 30 days of receipt of EPA's written demand, Defendants
shall pay interest on the late payment for each day after the initial thirty day due date. The rate
of interest shall be the most recent interest rate determined pursuant to 28 U.S.C. § 1961.

15 58. Stipulated penalties are not the Plaintiff's exclusive remedy for violations of this
16 Stipulated Order for Preliminary Relief. The United States expressly reserves the right to seek
17 any other relief it deems appropriate, including, but not limited to, action for statutory penalties,
18 contempt, or injunctive relief against Defendants.

19 X. Force Majeure

20 59. Defendants shall perform all requirements of this Stipulated Order for Preliminary
21 Relief in accordance with the time schedules set forth except to the extent, and for the period of
22 time, that such performance is prevented or delayed by events which constitute a force majeure.

60. For the purposes of this Stipulated Order for Preliminary Relief, a force majeure is
defined as any event arising from causes beyond the control of Defendants and that cannot be
overcome by diligent and timely efforts of Defendants, including their contractors. Economic
hardship, lack of a political consensus, normal inclement weather, and increased costs of

27

5

6

7

8

28 REVISED 7-26-04

performance shall not be considered events beyond the reasonable control of Defendants for
 purposes of determining whether an event is force majeure. The requirement that Defendants
 exercise diligent and timely efforts to fulfill their obligations includes using best efforts to
 anticipate any force majeure event and best efforts to address the effects of any potential force
 majeure event (1) as it is occurring and (2) following the potential force majeure events, such that
 delay is minimized to the greatest extent possible.

61. In the event of a force majeure, the time of performance of the activity delayed by the force majeure shall be extended by EPA for the time period of the delay attributable to the force majeure. An extension of one compliance date based on a particular incident does not necessarily result in an extension of a subsequent compliance date or dates. Defendants must make an individual showing of proof regarding each delayed incremental step or other requirement for which an extension is sought. Defendants shall adopt all reasonable measures to avoid or minimize any delay caused by a force majeure.

62. When an event occurs or has occurred that may delay or prevent the performance 14 of any obligation under this Stipulated Order for Preliminary Relief, Defendants shall notify by 15 telephone the Manager, Pacific Islands Office, Region 9, (415) 972-3774, or the Guam Program 16 Manager, Pacific Islands Office, Region 9, (415) 972-3770, within 72 hours of Defendants' 17 knowledge of such event. If Defendants are unable to contact EPA Region 9, Defendants shall 18 notify by telephone the U.S. Attorney's Office for the District of Guam at 472-7332, extension 19 119 or 121. Telephone notification shall be followed by written notification made within seven 20 days of Defendants' knowledge of the event. The written notification shall fully describe: the 21 event that may delay or prevent performance; reasons for the delay; the reason the delay is 22 beyond the reasonable control of Defendants if they believe the event constitutes a force majeure: 23 the anticipated duration of the delay; actions taken or to be taken to prevent or minimize the 24 delay; a schedule for implementation of any measures to be taken to mitigate the effect of the 25 delay; and the time needed to implement any dependent activities. For purposes of this Section, 26

27 28

Defendants shall be deemed to have knowledge of anything they or their contractors knew or
 should have known.

3 63. Failure of Defendants to comply with the force majeure notice requirements
4 provided in Paragraph 62 for any delay in performance will be deemed an automatic forfeiture of
5 their right to assert that the delay was caused by a force majeure.

6 64. After receiving written notification from Defendants of a force majeure, EPA
7 shall determine whether Defendants' request for delay is justified and EPA shall notify
8 Defendants of its determination in writing. EPA's failure to respond within 30 days to a request
9 for delay by Defendants shall be deemed a denial of that request. If Defendants disagree with
10 EPA's determination, Defendants may initiate dispute resolution procedures pursuant to Section
11 XI (Dispute Resolution).

12 65. Defendants shall bear the burden of proving that any delay or violation of any 13 requirement of this Stipulated Order for Preliminary Relief was caused by circumstances beyond 14 their control, or any entity under their control, including consultants and contractors, and that 15 Defendants could not have reasonably foreseen and prevented such violation. Defendants shall 16 also bear the burden of proving the duration and extent of any delay or violation attributable to 17 such circumstances.

18 XI. Dispute Resolution

28

The Dispute Resolution procedures of this Section shall be the exclusive
 mechanism to resolve disputes arising under or with respect to the Stipulated Order for
 Preliminary Relief. However, the procedures set forth in this Section shall not apply to actions
 by the United States to enforce obligations by Defendants under this Stipulated Order for
 Preliminary Relief that have not been disputed in accordance with this Section.

67. If Defendants dispute any determination made by EPA under this Stipulated Order
for Preliminary Relief, Defendants shall send a written notice to EPA and DOJ outlining the
nature of the dispute, submitting all supporting information and document relating to the dispute,

describing its proposed resolution, and requesting informal negotiations to resolve the dispute.
 Such period of informal negotiations shall not extend beyond 15 days from the date when notice
 was received by EPA and DOJ unless the parties agree otherwise in writing.

68. If the informal negotiations are unsuccessful, the disputed determination by EPA
shall control, unless Defendants file a motion with this Court for dispute resolution. Any such
motion must be filed within 30 days after termination of informal negotiations and must be
concurrently sent to EPA and DOJ. The United States shall then have 30 days to respond to
Defendants' motion. In any such dispute resolution proceeding, Defendants bear the burden of
proving that EPA was arbitrary and capricious.

10 XII. <u>Applicability</u>

69. The provisions of this Stipulated Order for Preliminary Relief shall apply to and
be binding upon GWA, its officers, agents, employees, trustees, successors, and assigns, the
Government of Guam, its elected officials, officers, agents, employees, trustees, successors, and
assigns, and the United States, on behalf of EPA.

15 XIII. General

70. This Stipulated Order for Preliminary Relief is enforceable in all of its terms by
the Court.

71. This Stipulated Order for Preliminary Relief is not and shall not be construed as 18 either an NPDES permit or a modification of any existing NPDES permit. By entering into this 19 Stipulated Order for Preliminary Relief, the United States does not warrant in any manner that 20Defendants' complete compliance with the terms of this Stipulated Order for Preliminary Relief -1 will result in compliance with the provisions of the CWA, the SDWA, and regulations 22 promulgated pursuant to those statutes. Defendants' complete compliance with the terms of this 23 Stipulated Order for Preliminary Relief does not affect or resolve the United States' claims for 24 25 civil penalties or permanent injunctive relief.

26 27

28

72. This Stipulated Order for Preliminary Relief shall not affect GWA's obligation to

comply with its NPDES permits and with all applicable federal laws, regulations, and permits.

73. This Stipulated Order for Preliminary Relief does not limit or affect the rights of
the United States or Defendants against any third parties, nor does it limit the rights of third
parties who are not parties to this Stipulated Order for Preliminary Relief. In addition, this
Stipulated Order for Preliminary Relief is not to be construed as creating rights or obligations in
third parties.

7 74. Each undersigned representative of Defendants and the Assistant United States
8 Attorney certifies that he is fully authorized to enter into the terms and conditions of this
9 Stipulated Order for Preliminary Relief, to execute the document, and to legally bind the party he
10 represents to this document.

11 XIV. Modification

1

18

19

12 75. There shall be no material modifications of this Stipulated Order for Preliminary 13 Relief without the written approval of the parties to this Stipulated Order for Preliminary Relief 14 and the approval of the Court. All non-material modifications, which may include extensions of 15 the time frames and schedules for performance of the terms and conditions of this Stipulated 16 Order for Preliminary Relief, may be made by agreement of the parties and shall be effective 17 upon filing by the United States of such modifications with the Court.

BEFORE THE GUAM PUBLIC UTILITIES COMMISSION

871 472 1917

GUAM WATERWORKS AUTHORITY REGULATORY MATTERS

[Miscellaneous Dockets]

ORDER

By this Order, duly considered at the Commission's April 10, 2003' meeting and by the affirmative vote of at least four Commissioners, the Commission takes action on a number of regulatory matters concerning Guam Waterworks Authority [GWA]. This Order addresses the following regulatory subjects:

1. GWA Staffing Study [Docket 01-07].

On April 2, 2003 the Commission conducted a public hearing to consider Georgetown's staffing study of GWA. The study is mandated by P.L. 26-23 and by the Commission's September 13, 2001 Order. GWA filed no comments regarding the study. After discussion and on motion duly made, seconded and carried, the Commission orders that the study be approved. ALJ is authorized and directed to cause the publication of the study results in accordance with P.L. 26-23. For the record, the Commission notes advice from the Consolidated Commission on Utilities [CCU] that it intends to pursue legislation, which will relieve GPA and GWA from the staffing study requirements of P.L. 26-23.

2. GWA/Navy Settlement [Docket 00-01].

CCU has informed the Commission that it is in the final stages of negotiations with Navy regarding the settlement of litigation for amounts owed by GWA to Navy for water services. Under the proposed settlement, GWA would pay Navy \$9 million over 105 months with interest. CCU has proposed and requested that the surcharge, which was established by Commission order dated September 13, 2001; then placed under a one year moratorium by P.L. 26-81; and which is subject to automatic reactivation on May 6, 2003, be amended to permit its use to fund the Navy settlement in addition to regulatory fees and amounts owed to GPA. The Commission has informed CCU that at its request; the Commission would, on its own initiative, commence proceedings to consider this concept during the June 2003 regulatory session. In the event such a request is filed *[which may request consideration of other collateral* rate *issues]*, ALJ is authorized and directed to oversee prehearing activities, which will lead to June hearing.

3. USA v. GWA [District Court Civil Case 02-035] [Docket 02-02]

Federal EPA and GWA are currently negotiating the terms of a stipulated order [Stipulated Order], by which GWA, under EPA oversight, will undertake a broad initiative to restore it facilities and to provide safe, reliable, lawful service to the island. A copy of the proposed 37-page draft Stipulated Order was provided to the Commission for comment. Commission comments were submitted to the party litigants by Chairman Brooks' March 27, 2003 letter. EPA has since conferred with the Commission regarding the important role the Commission will serve under the Stipulated Order.

An issue raised by the Stipulated Order is the extent to which the Commission should be involved, under 12 GCA 12004 [contract review authority], in reviewing and issuing prior approval of substantial GWA procurements, which are required by the Stipulated Order. After considering Georgetown's position on this issue [GCG letter dated April 4, 2003] and after discussion with its ALJ, on motion duly made, seconded and carried, the Commission finds that the essential purpose of section 12004 [Commission review of reasonableness and prudence of proposed procurement] is satisfactorily addressed by the history of the EFA litigation, the depth and scope of the Stipulated Order, and by the fact that EPA will serve a significant oversight role in the crafting and implementation of the various procurements. Accordingly, the Commission finds and orders that procurements required by the Stipulated Order shall not require Commission review and approval under its contract review protocol. The Commission wants to make a clear distinction, under the Stipulated Order between these procurements and the interim and final financial plans, which shall undergo a thorough Commission review and approval process. This Commission decision is part of a broader initiative to reduce regulatory expense and to redefine the necessary scope of its regulatory authority, given the presence of the publicly elected CCU.

For the record, the Commission renews its commitment, as made in its March 14, 2002 Order, that it will provide GWA in a timely manner with adequate rate relief to enable it to comply with an EPA approved strategic plan to restore the utility and bring it into compliance with Federal law.

4. GWA Water Service Charge.

By CCU email inquiry dated March 3, 2003, the Commission was made aware of controversy relating to GWA's practice of assessing a basic service fee for water service, without regard to whether water service is available to a customer. By his March 13, 2003 letter, ALJ posed to GWA and Georgetown questions

671 472 1917

Page 3 - Commission GWA Order - April 10, 2003

regarding this practice and required responses by April 8. ALJ is authorized and empowered after reviewing these responses to determine whether this issue should be included as a matter for Commission consideration during the anticipated June rate hearing.

5. GWA Regulatory Compliance.

GWA is not in compliance with its obligations under the Commission's contract review protocol [Commission Order dated February 20, 2000]. Under separate order and as part of a reduction in regulatory work and expense, the Commission has announced a protocol under which it will attempt to rely on GWA reports in lieu of Georgetown studies regarding GWA accounts receivable, payables, financial condition and significant management initiatives. The

Commission has emphasized to CCU the importance of GWA providing this information in a complete and timely manner so that the Commission can discharge its surveillance duty under law.

GWA has also been reminded of the Commission's December 17, 1999 Administrative Order, which provides that a utility will not be awarded regulatory relief unless its regulatory account with the Commission is current. Pursuant to the terms of the surcharge established by Commission Order dated September 13, 2001 in Docket 00-01, Commission fees are to be paid from the surcharge proceeds. Accordingly, availability of funds is not an issue regarding the timely payment of regulatory fees.]

GWA is cautioned that it must bring itself into full regulatory compliance in advance of the June regulatory session.

In light of the Stipulated Order discussed in paragraph 3 above, Commission order regarding GWA compliance with the terms and recommendations of the Commission's revenue cycle audit [see Commission Consolidated Order dated December 11, 2001] is abated until further notice. GWA is nevertheless encouraged to consider the audit recommendations as part of its reorganization activities.

Dated this 10th d of April 2003.
